SEO Audit Toolkit

Auditing a website is a difficult and time-consuming task. To save time and get better results, you'll definitely need some tools.

Comprehensive audit tools:

- [Screaming Frog](#) - crawls your entire website and gives you a lot of insights on how to improve. You can also download it to your computer, which makes the crawling process faster.
- [SEMrush Site Audit Tool](#) - gives you a list of issues, prioritized from severe errors to recommendations. You can also access the historical and comparative sections, where you'll see your website's progress since previous audits.
- [Google Search Console](#) - a great resource for checking your website's technical health. You'll be able to identify crawl errors, structured data errors, etc.
- [WooRank](#) - scans your website and searches for indexation problems, missing metadata, duplicate content, backlink issues and so on.
- [Zadro Web SEO Auditor](#) - a great SEO audit tool that provides insights and easy to understand data to help you fix technical errors, with additional keyword data and more.

Accessibility and performance checkers:

- [Robots.txt Analyzer](#)
- [YSlow](#)
- [Meta Tag Analyzer](#)

Backlink checkers:

- [Ahrefs](#)
- [Majestic](#)

Broken link checkers:

- [Broken Link Checker](#)
- [Xenu Link Sleuth](#)
- [W3C Link Checker](#)

Duplicate content and plagiarism checkers:

- [Copyscape](#)
- [Small SEO Tools Plagiarism Checker](#)
- [PlagSpotter](#)

Page speed checkers:

- [PageSpeed Insights](#) by Google
